LUXATIP

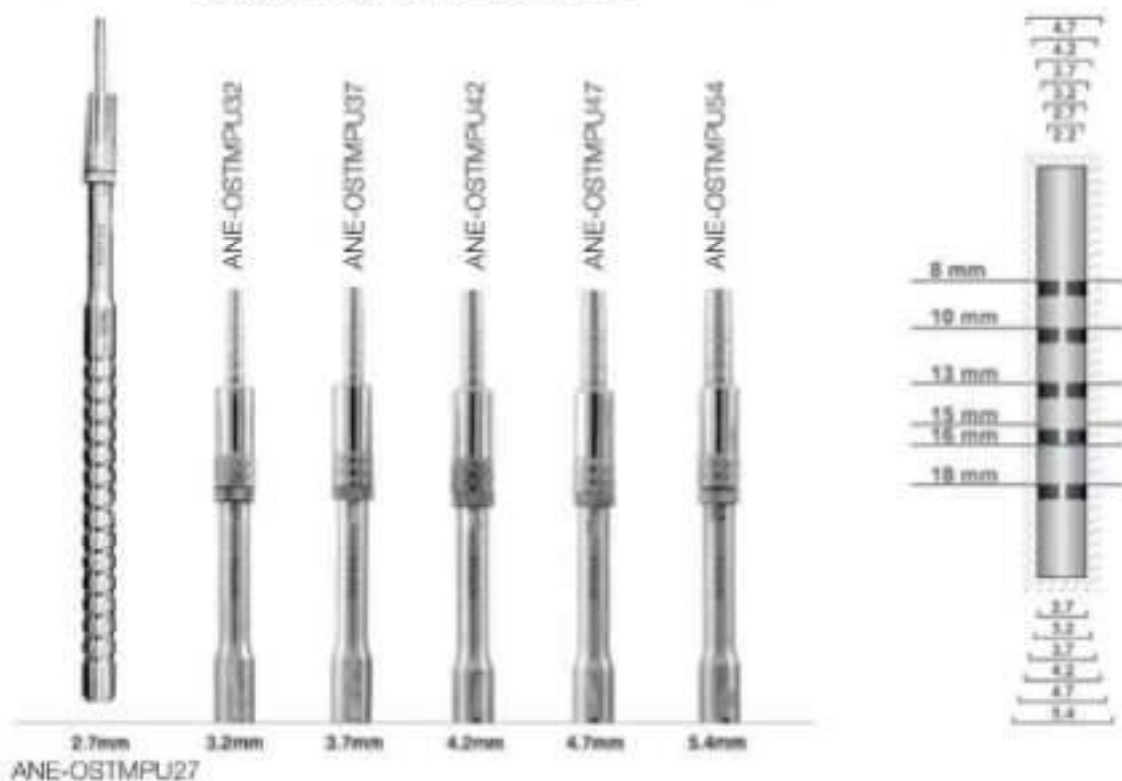

Luxatip Kit comprises of seven Luxation instruments, a straight, curved, inverted curved & contra blade version in Three different widths.

Also available in dual edge blades

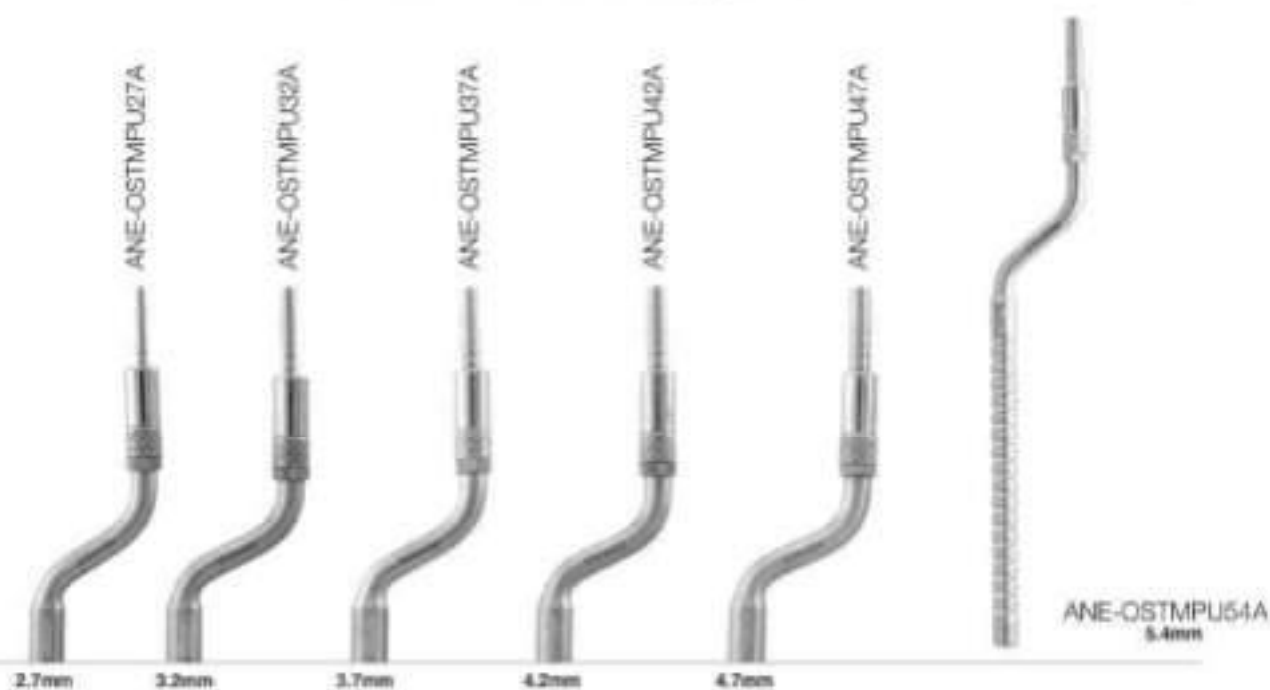

- L2S Straight Blade- Green-2 mm- Apical and/or Interproximal
- L3C Curved Blade- Black-3 mm-General use/Scaler
- L3S Straight Blade- Grey- 3 mm Interproximal
- L3CA Contra Angle- Blue-3mm Lingual and/or distal Molars
- L3IC Inverted Curved- Light Blue-3mm-General Lingual and/or Distal
- L5C Curved Blade- Brown-5 mm- Large molar roots-General use
- L5S Straight Blade-Yellow-5mm-Interproximal
- DE3 dual edge/straight grey 3 mm/1.5 mm
- DE5 dual edge/straight brown 3 mm/3 mm

Anterior Kit

ANE-TNCGFT3
Flexible, reversed, tapered paddle design for shaping and placement of Class II and IV restorations.

ANE-TNCFPL
For final placement in Class I and II restorations. The larger, round ball end is used for condensing and shaping in Class I and II restorations and on lingual surfaces of anterior teeth.

ANE-TNCFPM
For small pits and fissures, as well as placement and condensing with limited access.

ANE-TNCFPS
Micro-Mix for extremely small pits and fissures.

ANE-TNCGFTMI1
Mini version of the TNCGFTM1 for small pits and fissures, tunnel preparations or minor tooth defects on lower anterior.

Posterior Kit

ANE-TNCFISM
Rounded cone-shaped paired instrument designed to provide firm contact for initial placement and contouring of Class II restorations.

ANE-TNCFIML
Rounded cone-shaped instrument to provide improved contact forming for medium/large Class II restorations.

ANE-TNPLGSA
Small, round, inverted cone plunger for use with condensable composite material in posterior restorations.

ANE-TNPLGOT
Rhomboid-shaped plunger for use with condensable composite material in posterior restorations.

ANE-TNPLGH3
Rectangular-shaped plunger for use with condensable composite material in posterior restorations.

Gold Flexi Thin

ANE-CIGFT1
Small universal style with rounded plunger tip and a narrow paddle for initial placement and contouring of Class I and II restorations.

ANE-CIGFT2
Large universal style for final placement and contouring of Class I, II and III restorations.

ANE-CIGFT3
Flexible, reversed, tapered paddle design for shaping and placement of Class II and IV restorations.

ANE-CIGFT4
Flexible, paired, offset, paddle-shaped blade for placing and shaping material on posterior, mesial and distal surfaces. Reverse angle is also useful for placing and shaping anterior bonded restorations.

ANE-CIGFTMINI3
Mini version of the CIGFT3. Can also be used for packing gingival retraction cord.

ANE-CIGFTMINI1
Mini version of the CIGFT1 for small pits and fissures, tunnel preparations or minor tooth defects on lower anterior.

ISO* SIZED PLUGGER COLOUR CODED

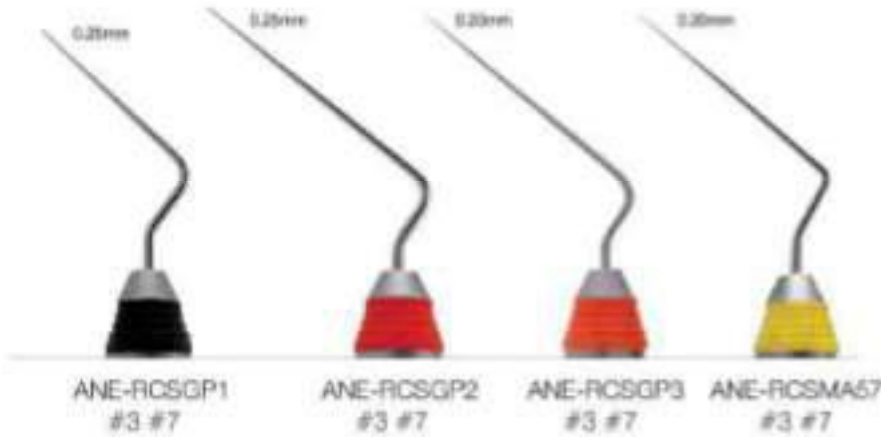

LUKS

SPREADERS, HEAT CARRIERS

ISO sized spreaders with color coded handles for easy identification, heat carriers, and a variety of other popular spreaders. Our spreaders help the clinician gain access into the most difficult canals for optimal compaction of filling material during lateral condensation.

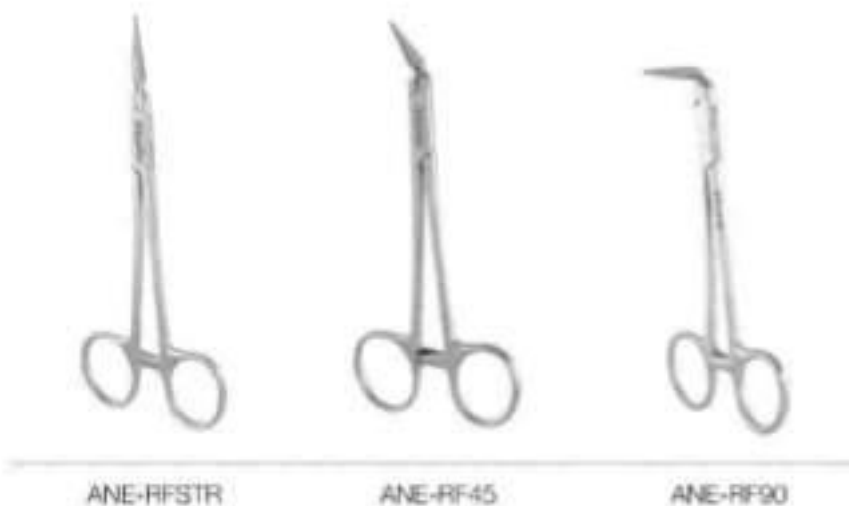

NERVE-CANAL PLIERS

Nerve-Canal Pliers for grasping fractured root canal instruments or silver pins. The very fine, concave cutout on the working tip allows to remove even deep-lying fractured files.

STANDARD

Gracey Curette Standard
Originally designed to be finishing curettes for fine scaling and root planing. The combination of this unique blade and 2 different shank designs for specific tooth surfaces provide improved adaptation and deposit removal in scaling procedures.

MINI FIVE

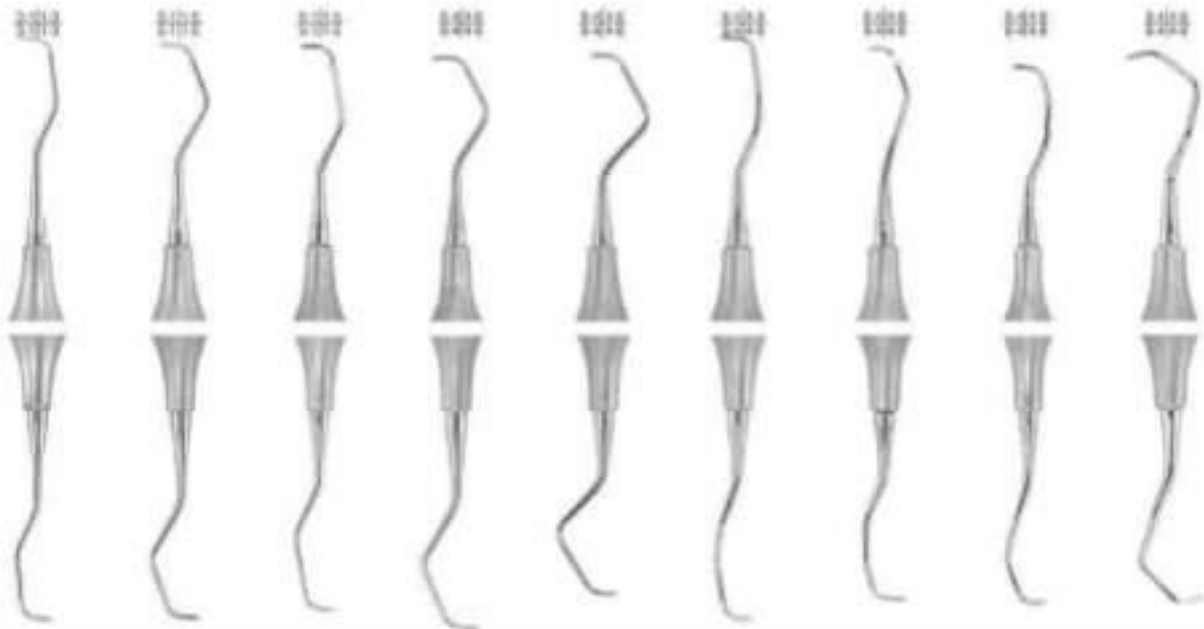

Gracey Curette Mini Five

- Terminal shank is 3mm longer than Standard Gracey
- Compared to the standard Gracey curette, blade is 50% shorter and 10% thinner
- Good for scaling in deep, narrow pockets

- Bridge remover tip with lock #ANE-CR7 (for TRT-CRP)
- Tips adjustment Key #ANE-CR9
- Open-end adjustment wrench #ANE-CR10

Terms of Use

Removal of:

- Permanently cemented crown and/or bridges
- Temporarily cemented provisional or final restorations
- Maryland bridges
- Orthodontic brackets/bands
- Removable appliances "stuck" at attachments
- Multi-unit restoration "stuck" on working lab model

Precautions :

1. To remove crowns placed over pins or screw type posts, use lowest "strike intensity" to prevent fracture.
2. This instrument could cause damage to the margins of soft gold crowns, if re-use is anticipated, cut a small groove parallel to the lingual margin.
3. Highest strike intensity could cause root fracture; be careful in long span restorations.
4. Only low intensity strike force should be used with teeth having high mobility and little bone support.
5. For highest strike intensity settings, let the individual situation and common sense prevail.
